Traffic Safety Action-shop
SOUTHEAST UPLIFT
Track 2: Environmental Change/ Design

Hannah Day-Kapell, Sunnyside Neighborhood Board Vice-Chair
February 23, 2017
ENGAGING WITH THE PROCESS

- Define the problem
- Identify the toolkit of solutions
- Undergo engineering guidance
- Consider temporary solutions
DEFINE THE PROBLEM

• Speeding
• No marked crossing
• Wide crossing
• Poor yielding to peds
IDENTIFY THE TOOLKIT OF SOLUTIONS

- Marked crosswalk
- Curb extensions
- Median island
- Pedestrian warning signs
SUPPLEMENTAL SIGNS & MARKINGS:
MARKED CROSSWALKS
GEOMETRIC ELEMENTS:
CURB EXTENSIONS
GEOMETRIC ELEMENTS:
PEDESTRIAN SAFETY ISLANDS
CROSSING DEVICES:
ACTIVE WARNING BEACON (RRFB)

Providing secondary installations of RRFBs on median islands improves driver yielding behavior.

Rectangular Rapid Flash Beacons (RRFB) dramatically increase compliance over conventional warning beacons.
CROSSING DEVICES:
PEDESTRIAN HYBRID SIGNAL (HAWK)
UNDERGO ENGINEERING GUIDANCE
CONSIDER TEMPORARY SOLUTIONS

Austin, TX
CONSIDER TEMPORARY SOLUTIONS

Fremont, CA
CONSIDER TEMPORARY SOLUTIONS
